Optogrid device current consumption testing method

Expected current: 0–30 mA
Shunt drop ≤ 0.3 V
Device input ≥ 3.8 V

MATLAB test sequence

1. Idle - 5 s
2. Status LED - 5 s
3. Sham LED - 5 s
4. Programming - 5 s
5. Stimulation - 5 s
6. IMU streaming @100Hz - 15 s
7. Battery read ×10
8. µLED check ×10

3 s between tasks, < 80 s total
